

SCOTT'S CREEK

GROWLING FROG SHIRAZ 2015

Scotts Creek is a real place. With Sustainability at its heart – wetlands, water usage, wildlife and wine growing.

Inside each bottle of Growling Frog lies a wine that is just as precious as the frog for which it is named. The Growling Grass Frog is an endangered species, but their presence in the 870 hectares of Scotts Creek wetlands, one of South Australia's largest, is a sure sign of a healthy natural ecosystem.

The first vines were planted by Penfolds over 25 years ago. This area was selected for its stony soils over a limestone base, to produce grape varieties of immense character and resilience. The longer periods of sunshine and warm dry climate deliver consistent high quality fruit.

Fruit	Region	Alcohol	Closure
100% Shiraz	Riverland	14.5%	Screw cap

Winemaking

We picked parcels of fruit at various points throughout vintage in order to maximise complexity in the finished wine. Fermented in stainless steel, and filtered before bottling, we have captured the essence of Riverland Shiraz.

Colour	Rich purple in colour with a magenta hue
Aroma	Bright redcurrant and blackberry with spiced cherry fruit and a hint of liquorice and pepper.
Palate	The medium-bodied palate has vibrant fruits of cherries, plums and spice. The fruit is complemented by carefully balanced mocha oak flavours. The finish is long with pleasant softness.
